

Bola bowling machines

Machine powered directly through 12V Battery option.

Machine powered directly through Power pack option.

POWER SOURCE OPTIONS

1

1) Battery option - When there is power shortage or no power source, machine can be connected to a 12v battery. When battery is discharge it can be charged through the Power pack overnight. Battery Cables (provided) **Red** should be plugged to **+ positive & Black** should be fitted to **- Negative** terminals. When battery is fully charged, power pack will stop the charge automatically. Battery specification: 12V DC, 42AH will give backup for 3~4 hours. Note: more the AH (Ampere Hour) gives more backup time.

2

2) Bola Power pack(mains option) + charging cables- A 240v high amperage transformer giving a smooth DC 12V supply for BOLA Bowling Machines. This enables the BOLA to be used from a mains outlet. Circuitry also includes a built in battery charger for overnight charging of battery.
