

Dear customer,

**Cricket Bowling machines are one time investment, so think twice, be wise and make right choice !!**

Below are some major technical differences between the Bola & other brand.

	<b>Bola Pro</b>	<b>Other copied brand</b>	
<b>Power supply</b>	AC 220V through powerpack with built-in battery charger. DC12V car battery – where there is no power, run the machine on car battery.	AC 220V direct no power pack. No protection against voltage fluctuation. No option of 12v.	
<b>Weight</b>	15~19Kgs Extremely lightweight & portable for single person handling.	50 + kgs. Requires 2 or more person to carry.	
<b>Storage</b>	Special storage PVC box provided. Safety from water or pest.	Not provided	
<b>Line &amp; length adjustment</b>	Simple mechanical adjustment with Manual fine thread knobs for line & Length. Need to rotate only half-a-thread for major delivery result.	Electronics motors and solenoid switch. More electronics give more problems & also consumes more power.	
<b>Wheel stand</b>	Tripod (3legs) stand provided. Wheels are Not necessary due to its light weight design. But can be provided in package.	Due to its heavy weight design it is mounted on 4 legs. Wheels are provided as it is not portable.	
<b>Friction wheels accuracy.</b>	Polyurethane concave wheels, which are aerodynamically balanced for 'ZERO' vibration giving accurate pinpoint deliveries for every ball.	Polyurethane concave wheels. High vibration will not only cause delivery problem, but in later stage will also bring high maintenance on electronics.	

<b>Auto ball feeder</b>	28ball feeder with wireless remote control. With per delivery Beep sound and Light indication. With option of ball delivery interval of 6 & 11 seconds.	Not provided	
<b>Random Ball delivery</b>	Random ball delivery is a preprogrammed chip which can change the delivery of every ball & perfect practice drill to improve skills.	Not available	
<b>Control panel</b>	Digital control panel with speed and bias (spin, swing variation) display. Also indicates the strength of ball turn.	Manual knob setting without indicators for spin/swing etc, Which could be very confusing to the operator.	
<b>Motors</b>	High speed imported motors. Quite running, With electronic braking system that helps during the quick speed change.	Indian make with loud noise & no braking provided.	
<b>Speed sensors</b>	Speed sensors for quick recovery after every ball delivery & accuracy.	Not provided	
<b>About us</b>	UK Engineered, (Since 1989) with 20 years dedicated in manufacturing only cricket bowling machines.	Since 2008, Copied version of Bola & Hako machine. Manufacturer of tea/coffee vending machine.	
<b>Approved &amp; Buyers</b>	International Cricket Council (ICC), England cricket board (ECB), Board of cricket control in India (BCCI), Asian Cricket Council (ACC) National cricket academy (NCA). All other major cricket academies run by ex-cricketers, coaches etc.	Not approved. Mainly sold to entertainment sector, resorts, shopping malls etc.	
<b>After sales support</b>	Ha-ko Onsite service engineer visit for any repairs, free replacement of any parts within warranty period. Free demo & training after purchase.	Not known.
